SUBJECT INDEX
VOLUME 61

A antigen
  Marek's disease herpesvirus polypeptide gene
    identification, 2614
Abelson murine leukemia virus
  clonal dominance and progression
    integration events, 2192
    lymphomagenesis, 2192
  helper Moloney MuLV LTR
    role in tumor formation, 3266
Acyclovir
  dual infection with herpes simplex virus and Epstein-Barr virus
    effects of 9-(1,3-dihydroxy-2-propoxymethyl)guanine and, 607
Acylation
  human adenovirus type 5
    early region 1B 176R protein, 3227
Adeno-associated virus
  hydroxyurea-pretreated cells
    helper-independent replication, 972
  recombinant plasmid
    DNA rescue and replication, 3096
S-Adenosylhomocysteine
  Epstein-Barr virus DNA
    effects on transformation, expression, and methylation, 221
Adenovirus expression system
  middle T-antigen expression
    characterization, 1221
Adenovirus serotype 2
  nuclear matrix structure
    rearrangements after infection, 1007
Adenovirus type 2
  core nucleoprotein subunits
    isolation and characterization, 3335
  E1A 12S gene product
    DNA synthesis induction, 673
    proliferation in epithelial cells, 673
  E1a proteins
    differential nuclear localization, 247
  E2A promoter
    gene expression, 3710
    methylation pattern stability, 3710
  early region 1B proteins
    amino terminus similarity with 495R and 155R proteins, 3879
    identification, 3879
  early region 4 H2*dl*807 mutant
    particle assembly requirements, 3759
  IV_{a2} promoter
    RNA synthesis regulation, 646
    transcription factor identification, 646
  natural killer cell cytolytic competence
    immunological surveillance, 2155
    tumor susceptibility of athymic rodents, 2155
  transcription termination signals
    cat mRNA inhibition, 2770
    DNA sequence localization, 2770
Adenovirus type 5
  core nucleoprotein subunits
    isolation and characterization, 3335
  DNA polymerase mutation
    transformation ability, 3630
  early region 1B 176R protein
    acylation, 3227
  early region 4-encoded polypeptides
    analysis, 543
  interferon treatment effects
    coinfection with vesicular stomatitis virus, 787
    modulation by early region 1A, 787
  repeated sequence element
    identification and localization, 2555
    packaging signal characterization, 2555
  ribonucleoprotein complexes in infected cells
    mRNA and hnRNA association, 3276
Adenovirus type 7
  temperature-sensitive mutants
    isolation and characterization, 3089
Adenovirus type 12
  early region 1A
    interferon induction, 2326
    stimulatory function, 2326
  hamster cell DNA insertion
    integration in intracisternal A particle genome, 2719
Adenovirus type 35
  early glycoprotein E29
    characterization, 3665
    comparison with adenovirus type 2, 3665
Adenovirus types 2 and 5
  E1A gene products
    susceptibility to natural killer cell lysis, 3510
  human lymphoid cell cultures
    productive infection, 1466
Adenovirus vector
  Epstein-Barr virus nuclear antigen EBNA3 gene
    mapping, 3340
    overexpression in human cells, 3340
  polyomavirus middle T antigen
    overproduction in mammalian cells, 1226
Adenoviruses
  cytoskeletal protein vimentin
    cleavage and processing, 2559
    early occurrence in infection, 2559
  E3 region
    pre-mRNA processing effect, 3938
  fowl adenovirus type 1
    DNA-transformed cells
    preferential clustering of viral DNA, 151
    site of chromosomal rearrangements, 151
  human adenovirus type 2 cell membrane permeability changes
    Na^+,K^+-ATPase role, 883
  interactions between E1A and E1B proteins
    expression of mutant phenotypes, 426
Adenovirus-transformed cell lines
  mammalian recombination events
    insertion sites, 344
    transcriptional activities, 344
  rat hepatocytes
    E1A and E1B gene transfection, 3570
Adenylate cyclase system
  JHM virus expression
    activation in rat cells, 3795
    demyelinating disease model, 3795
Agnogene defects
  simian virus 40 VP1 missense mutations
    LP1 and VP1 interaction, 3190
    suppression, 3190
Agnoprotein mutants
  simian virus 40 replication and maturation pathways
    role, 937
Agnoprotein synthesis
  simian virus 40 mutant
    late mRNA translation initiation, 2331
AKR murine leukemia virus
  germ line integration into retroviruslike sequence
    long terminal repeat analysis, 701
Akvr-1 restriction gene
  murine leukemia virus
    characterization, 308
Aleutian disease virus
  acute interstitial pneumonia in mink kits
    sequential development, 81
  in situ hybridization technique
    cellular localization of replication, 2407
α Genes
  α-*trans*-inducing factor-dependent activation
    herpes simplex virus type 1, 992
  myxoma virus epidermal growth factor and transforming growth factor
    mapping and sequencing, 1271
alpha mRNAs
  herpes simplex virus type 1 *vhs*1 mutant
    stability of immediate-early polypeptides, 604
Amino-terminal sequence
  herpes simplex virus type 1 glycoprotein B
    synthesis in vitro, 1
Amphotropic murine leukemia virus
  env-specific proviral DNAs
    absence from *Mus* germ line, 2225
Antibody response
  inactivated influenza virus vaccine
    hemagglutinin-specific immunoglobulin A synthesis, 2150
    induction intragastrically, 2150
    lymphocyte homing, 2150
  lymphocytic choriomeningitis virus infection
    Lyt-2^+ T lymphocyte role, 1867
    recovery mechanism, 1867
  scrapie-associated fibril proteins
    induction in mice, 3688
  vesicular stomatitis virus serotypes
    asymmetrically cross-reactive antibodies, 2509
    immunodominance of serotype-specific determinants, 2509
Antibody-binding epitope
  feline leukemia virus variant
    antibody resistance, 3410
Antigenic drift
  visna virus envelope glycoprotein gp135
    topographical rearrangements, 1019
Antigenic epitopes
  human immunodeficiency virus envelope proteins
    computer-assisted analysis, 570
    prediction in conserved and variable regions, 570
Antigenic properties
  feline coronavirus isolates
    comparison, 2607
    peplomer glycoprotein differences, 2607
  feline infectious peritonitis virus isolates

differences, 2655
human papillomavirus types 6b and 16 L1 ORFs
characterization, 2389
poliovirus type 3
modification by host enzymes, 3749
vaccine implications, 3749
Antigenic relatedness
human respiratory syncytial virus subgroups A and B
F and G glycoprotein role in immunity, 3163
vaccinia virus recombinant-conferred protection, 3163
Antigenic variation
equine infectious anemia virus
immune response role, 3783
equine infectious anemia virus variants
glycoprotein gp90 epitopes, 2956
monoclonal antibody analysis, 2956
Antigenicity
hepatitis A virus genome
cDNA expression, 3645
Antigen-presenting cells
herpes simplex virus type 1 virulence
Langerhans cell density role, 2515
mouse age and genetic strain role, 2515
virus strain pathogenicity role, 2515
influenza virus hemagglutinin molecule
helper T-cell role, 1375
receptor-binding activity, 1375
Anti-idiotypic antibodies
production against polyomavirus monoclonal antibody
infection prevention in mouse kidney cells, 2747
Antipeptide antibodies
feline leukemia virus
envelope gene neutralizing regions, 8
herpes simplex virus type 1 glycoprotein D N-terminal synthetic peptides
group VII monoclonal antibody analysis, 3607
structural properties and reactivity, 3607
Antisense RNA
Rous sarcoma virus *env* gene expression
replication inhibition, 921
Aphidicolin-resistant mutants
herpes simplex virus type 2
DNA sequence analysis, 388
Aphthovirus type 01 strain Campos
attenuated and virulent recombinants
isolation and characterization, 419
Arenaviruses
GP-C glycoproteins
cleavage site conservation, 982
definition by site-specific antibodies, 982
art gene protein
human T-lymphotropic virus type III
expression in bacteria, 633
Assembly pathway
bacteriophage T4 head
maturation of prohead core, 113
A+T-rich region
simian virus 40 mutant
COS cell accumulation, 2322
DNA replication function, 2322
Autographa californica nuclear polyhedrosis virus
arginine-rich polypeptide gene
location, transcription, and sequence, 661
early 35- and 94-kilodalton protein genes
divergent transcription, 2264
*Hin*dIII-K significance, 2264
overlapping sets of RNAs
gene organization in *Eco*RI J and N fragments, 3048
nucleotide sequence and restriction map, 3048
temporal control determination, 3048
regulatory gene IE-1
expression, 2091
sequence, 2091
Avian erythroblastosis viruses
gag-erbB fused gene
transforming ability, 1665
Avian hepadnaviruses
pre-S polypeptide
characterization, 1384
role in genomic replication, 3322
Avian leukemia virus E26
infected hematopoietic cells and fibroblasts
proviral expression, 3058
transforming and mitogenic effects, 3058
Avian leukosis virus
azidothymidine treatment
inhibitory effect, 2800
5′ long terminal repeats
functional impairments in tumors, 2489
pol protein processing
identification of new *pol* domain, 534
Rous-associated virus-0 *ev* expression
response to exogenous avian leukosis virus infection, 722
Avian leukosis virus provirus
chicken bursal lymphoma LL6
characterization, 1828
c-*myc* relationship, 1828
Avian leukosis virus subgroup F recombinants
induction of neoplastic diseases, 1203
sequence identification, 1203
Avian myeloblastosis virus
c-*myb* gene expression
p48$^{v\text{-}myb}$ effect, 3284
p48$^{v\text{-}myb}$ transformation
env-encoded residues unnecessary, 933
Avian myelocytomatosis virus MC29
deletion mutants
biological properties, 2138
quail macrophage transformation, 2138
Avian retroviruses
MH2 virus v-*mil* sequences
propagation in vivo or in vitro, 1949
v-*mil* oncogene
fibroblast transformation parameters, 1717
homology with v-*raf*, 1717
Avian sarcoma and leukosis viruses
long terminal repeat (LTR)-LTR junction
cleavage and growth sites, 1999
pol-endo gene recognition, 1999
Avian sarcoma virus
pol protein processing
identification of new *pol* domain, 534
3′-Azido-3′-deoxythymidine
avian leukosis virus
replication inhibition, 2800
Azidothymidine
avian leukosis virus
inhibitory effect, 2800
human immunodeficiency virus infection
effects on replication in T cells, 3769

B and *D* gene promoters
bacteriophage S13
mapping, 3694
B19 parvovirus
novel transcription map, 2395
Bacteriophages
bacteriophage Cflt
integration of DNA, 60
bacteriophage Cp-1 lysin gene *cpl*
cloning and purification, 2573
muramidase characterization, 2573
bacteriophage λ
expression in UV-irradiated cells and minicells, 3254
protein synthesis and degradation, 3254
bacteriophage P22 gene *23* product
cis specificity, 2316
expression, 2316
bacteriophage P22 late genes
expression and regulation, 3621
lacZ gene fusion, 3621
bacteriophage φ
transcription termination, 1751
bacteriophage φ6
nucleocapsid structure, 2362
bacteriophage φ6 nucleocapsid
protein P1 composition, 2621
bacteriophage φ29 DNA-protein p3 complex
NH_4^+ ion effect, 3983
bacteriophage φX174
mapping, 3694
bacteriophage PRD1
genome contains long, inverted terminal repeats, 594
bacteriophage S13 *B* and *D* gene promoters
mapping by footprinting and exonuclease analysis, 3694
bacteriophage S13 replicative form I DNA
RNA polymerase-binding site localization, 2297
bacteriophage T4
DNA sequence analysis, 2828
genetic control of capsid length, 2823, 2828, 2835
identification of two new genes, 366
petite and petite/giant mutants, 2828
ptg mutant phenotypes, 2835
ptg mutation localization, 2823
bacteriophage T4 head assembly pathway
maturation of prohead core, 113
bacteriophage T4 *r*II genes
lambda *rex* gene interaction, 3790
bacteriophage T4 RNA polymerase-binding protein
gene identification, 597
bacteriophage T7 genes 3 and 19
amber mutations effects, 3499
multidimensional analysis, 3499
choleraphage φ149
replication and packaging, 3999
coliphage QB β-subunit protein

interference with viral infection, 3946
RNA replicase function, 3946
corynebacteriophage CL31
expression in *E. coli*, 1540
structural characteristics, 1540
lambda *rex* genes
T4 *rII* gene interaction, 3790
mycoplasma viruses L2 and L2*ins1*
origins and termini mapping, 1909
Xp10 genome
rifampin resistance, 1695
transcription regulation, 1695
Baculovirus expression system
simian rotavirus SA11 recombinant
major capsid antigen VP6 synthesis, 1488
Baculovirus vectors
human immunodeficiency virus envelope glycoproteins
expression, 3617
human T-cell leukemia virus type I $p40^x$ protein
synthesis in eucaryotic cells, 708
influenza viral polymerase proteins
expression and complex formation, 361
polyomavirus large T antigen
expression, 1712
simian virus 40 intron-containing genes
expression, 1761
Baculoviruses
Autographa californica nuclear polyhedrosis virus genome
gene organization in *Eco*RI J and N fragments, 3048
overlapping sets of RNAs, 3048
temporal control determination, 3048
Autographa californica nuclear polyhedrosis virus regulatory genes
expression, 2091
sequence, 2091
gene encoding arginine-rich polypeptide
location, transcription, and sequence, 661
*Bam*HI fragment M
Epstein-Barr virus cDNA clone
characterization, 2943
overlapping mRNA isolation, 2943
*Bam*HI M fragment
Epstein-Barr virus BMRF1 and BMLF1 early antigens
cat gene transcription, 3310
*Bam*HI-H and -F regions
Epstein-Barr virus cDNA clones
isolation and characterization, 2902
B-cell cycle
measles virus infection
immunoglobulin secretion block, 3441
sequence of events, 3441
B-cell growth factor
Epstein-Barr virus
complement receptor CR2 binding, 774
synergism, 774
B-cell transformation
Epstein-Barr virus nuclear antigen EBNA 2
growth phenotype influence, 1310
BHRF1 open reading frame
Epstein-Barr virus *Bam*HI-H and -F regions
cDNA clones characterization and isolation, 2902
Bicistronic mRNA
Epstein-Barr virus nuclear proteins
identification and analysis, 945
Bicistronic RNA
measles virus phosphoprotein and matrix protein
structure and function, 584
BK virus
transcriptional control region
structure and function, 1747
Bluetongue virus
genetic reassortants
hemagglutinin gene identification, 2304
genome segment reassortment, 2670
nonstructural protein NS2
phosphorylation and purification, 3589
single-stranded RNA affinity, 3589
Bluetongue virus serotypes 10 and 17
genetic reassortment in vivo
mixed infection in sheep, 1086
BMRF1 and BMRF2 open reading frames
Epstein-Barr virus *Bam*HI fragment M
cDNA clone characterization, 2943
overlapping mRNA isolation, 2943
Borna disease virus
pathogenesis
incubation period, 3431
intra-axonal transport, 3431
Bottom-component RNA
cowpea mosaic virus peptide
detection of novel protein, 236
cowpea mosaic virus precursor protein
cleavage inhibitor activity, 912
Bovine enterovirus-3
bovine virus diarrhea virus monoclonal antibodies
inhibition, 2050
Bovine herpesvirus type 1
gI, gIII, and gIV expression
glycoprotein synthesis, 3292
vaccine role, 3292
latency-related RNA
trigeminal ganglia mapping, 3827
thymidine kinase gene
map location, 4023
Bovine leukemia virus
trans-acting factor and *cis*-acting response element interaction
transcription control, 2462
X-region nuclear phosphoprotein
expression in infected cells, 1577
Bovine papillomavirus
protein analysis, 3596
Bovine papillomavirus type 1
3′ open reading frames
mutational analysis, 3889
nucleotide 3225 splice junction, 3889
E2-responsive elements
localization, 2128
transcriptional regulation, 2128
open reading frame E4
late gene expression, 1248
mutational analysis, 1248
open reading frame proteins
characterization, 1655
DNA-binding activity, 1655
RNA levels and protein expression
tumorigenicity in hamster cells, 2924
transforming region promoters
identification, 2240
processing sites, 2240
Bovine parvovirus
nonstructural proteins
homology with other autonomous parvoviruses, 3612
identification, 3612
Bovine virus diarrhea virus
anticellular monoclonal antibodies
bovine enterovirus-3 inhibition, 2050
Brome mosaic virus
deletion analysis
RNA3 amplification requirements, 1457
BZLF1 open reading frame
Epstein-Barr virus polymorphic proteins
latency disruption, 3672

Calcium-binding activity
polyomavirus VP1 capsid protein
localization, 2934
Campoletis sonorensis virus
cross-hybridizing sequences
physical analysis, 2589
tandemly repeated element identification, 2589
Cap-binding complex
p220 in poliovirus-infected cells
monoclonal antibody-aided characterization, 2702
subcellular distribution and conformer identification, 2702
Capsid assembly
bacteriophage T4 petite and petite/giant mutations
DNA sequence analysis, 2828
bacteriophage T4 *ptg* mutations
clustering in gene 23, 2823
phenotypes, 2835
Capsid protease
Semliki Forest virus structural polyprotein
role and processing, 1301
Capsid protein VP1
foot-and-mouth disease virus subtyping
nucleotide sequence analysis, 1621
Capsid proteins
parvovirus B19
characterization, 2627
Cardioviruses
Theiler's murine encephalomyelitis virus
classification, 1507
nucleotide sequence analysis, 1507
cDNA clone
foot-and-mouth disease virus polyproteins
proteases 3C and L roles, 3199
proteolytic processing, 3199
hepatitis A virus
infectious RNA transcription vector, 3035
hepatitis A virus genome
antigenicity, 3645
expression in *E. coli*, 3645
infectious hematopoietic necrosis virus glycoprotein gene
mRNA sequence, 1342
Moloney murine leukemia virus *env* message
splice acceptor site, 2038
murine retroviral expression vector
$pp60^{c\text{-}src}$ clone generation, 1731
Sinbis virus
lethal mutation mapping, 3809
RNA transcript production, 3809
cDNA hybridization
encephalomyocarditis virus RNA trans-

lation
effects, 2033
cDNA sequencing
foot-and-mouth disease virus subtyping analysis, 1621
cDNA transfection
Sendai virus *C* gene
induction of interferon, 625
cDNA-RNA hybridization
hepatitis A virus
heterogeneity among human and nonhuman strains, 735
c-*fos* proto-oncogene
avian transforming virus NK24
cloning, 4012
nucleotide sequence analysis, 4012
Chicken c-*fos* gene
cloning, 4012
nucleotide sequence analysis, 4012
Chicken embryo fibroblasts
avian leukemia virus E26 infection
growth potential effect, 3058
proviral expression, 3058
Chicken v-*fos* gene
avian transforming retrovirus
characterization, 3733
nephroblastoma isolation, 3733
Chromatin structure
Moloney murine leukemia virus
proviral integration sites, 336
cis specificity
bacteriophage P22 gene *23* product
determination, 2316
expression, 2316
cis-Acting elements
Rous sarcoma virus Prague A DNA
gag gene role in transformation, 3401
localization, 3401
Classification
endogenous murine leukemia viruses
recombination potential, 2659
structural relationships, 2659
Clearance mechanisms
lymphocytic choriomeningitis virus
immune therapy of persistent infection, 3920
lymphocytic choriomeningitis virus effector cells
intercell cooperation, 3930
Clonal dominance
Abelson murine leukemia virus lymphomagenesis
integration events, 2192
transformation rate, 2192
c-*myb* activation
Moloney murine leukemia virus-induced myeloid tumors
v-*abl* involvement lacking, 3721
c-*myb* expression
avian erythroblastosis virus-transformed erythroblasts
effect of $p48^{v\text{-}myb}$ expression, 3284
c-*myb* gene
retroviral insertion in murine monocytic leukemias
RNA species characterization, 2754
transcript rearrangement, 2754
c-*myc* activation
reticuloendotheliosis virus B-lymphoma induction
mutated chicken syncytial virus provirus, 2084
Colorectal cell lines
human immunodeficiency virus
productive, persistent infection, 209
Complement C3d fragment
Epstein-Barr virus glycoprotein gp350
complement receptor binding action, 1416
sequence homology, 1416
Complement receptor CR2
Epstein-Barr virus
synergism with B-cell growth factor, 774
Concatemeric DNA
bacteriophage T7 genes 3 and 19
amber mutations effects, 3499
multidimensional analysis, 3499
Condylomata acuminata
human papillomavirus type 6b L1 open reading frame protein
antibody detection, 2684
identification, 2684
Core antigen
hepatitis B virus DNA clones
expression in human hepatocellular carcinoma cells, 3555
hepatitis B virus pre-S and precore sequences
expression, 683
influences, 683
Core antigen expression
hepatitis B virus
phosphorylation and protein analysis in vivo, 955
translation in vivo and in vitro, 3109
Core nucleoproteins
adenovirus types 2 and 5 subunits
isolation and characterization, 3335
Core origin
simian virus 40 72-bp-repeat enhancer
position and orientation effects, 2973
replication role, 2973
Core proteins
duck hepatitis B virus pre-C region
function, 3701
synthesis and secretion, 3701
equine infectious anemia virus *gag* polyprotein
characterization, 1116
isolation, 1116
Coronaviruses
duck hepatitis B virus DNA synthesis
initiation and termination, 3832
feline coronavirus isolates
antigenic comparison, 2607
peplomer glycoprotein differences, 2607
mouse hepatitis virus 5'-end RNA
RNA polymerase structure, 3968
sequence and translation, 3968
mouse hepatitis virus A59
replication in vitro, 1814
mouse hepatitis virus A59 glycoprotein E1
expression, 2042
Golgi region localization, 2042
mouse hepatitis virus-binding activity
genetic resistance, 185
Corynebacterium lilium bacteriophage CL31
structural characteristics
expression in *E. coli*, 1540
Cottontail rabbit papillomavirus
E6-coded polypeptides
early region transcription, 2938
identification, 2938
Coumermycin A_1 and novobiocin
herpes simplex virus type 1-infected mouse cells
reactivation inhibition, 3288
Cowpea mosaic virus
bottom-component RNA
characterization, 912
cleavage inhibitor activity, 912
detection of novel protein, 236
Cross-reactivity
herpes simplex virus types 1 and 2, Epstein-Barr virus, and cytomegalovirus
antigenic analysis, 1125
Cryoelectron microscopy
La Crosse virus
structural features, 2319
vitrified-hydrated virions, 2319
Cyclic AMP
polyomavirus and simian virus 40 transformants
effect on normal cell proliferation, 1546
Cytolytic susceptibility
adenovirus types 2 and 5 E1A gene products
natural killer cells and activated macrophages, 3510
Cytolytic T lymphocytes
murine cytomegalovirus immediate-early gene products
host immune response, 2054
Cytomegalovirus, human
DNA polymerase gene
genomic localization, 119
homology with other herpesviruses, 119, 125
sequence and transcription analysis, 119, 125
DNA-binding protein
purification and gene mapping, 3143
similarity to HSV ICP8, 3143
immediate-early region 2 gene products
identification and characterization, 3214
inducible promoter regulation, 3214
large structural phosphoprotein gene pp150
map position, 1358
nucleotide sequence, 1358
transcription analysis, 1358
phosphonoacetic acid-resistant mutants
isolation and characterization, 1291
phosphoproteins pp65 and pp71
nucleotide sequence, 446
primary structure and transcription, 446
Cytomegalovirus, murine
adoptive cellular immunity
modification of adrenalitis, 23
immediate-early genes
location, transcripts, and translation products, 526
interferon-dependent and -independent replication restriction
genetic resistance, 1875
murine cytomegalovirus immediate-early gene 1
sequence and structural organization, 1901
nonstructural immediate-early antigens
protective immunity role, 3102

peritoneal macrophage infection
comparative study, 3602
H-2-determined sensitivity, 3602
Cytomegaloviruses
herpes simplex virus types 1 and 2 and Epstein-Barr virus
cross-reactivity, 1125
immediate-early IE94 promoter
herpes simplex virus regulatory response, 819
interferon synthesis stimulation, 819
simian and human immediate-early IE94 promoters
nuclear factor 1-binding sites, 1559
tandem repeat elements, 1559
Cytopathic effects
human immunodeficiency virus
cell fusion requirements, 3114
mechanism of cell killing, 3114
human immunodeficiency virus strains
biologic behavior in immortalized cells, 1602
ovine lentiviruses
pathogenicity correlation in vivo, 4038
Cytoplasmic-localization mutant pSVCT3
simian virus 40 nuclear large T antigen
transformation of precrisis human cells, 3521
Cytotoxic T lymphocytes
adenovirus type 2-transformed cells
lysis by natural killer cells, 2155
tumor susceptibility of athymic rodents, 2155
herpes simplex virus glycoprotein gC expression
specificity, 2438
influenza A virus antigen recognition
major histocompatibility complex class I responsiveness, 1098
Cytotoxic T-cell response
herpes simplex virus type 1
glycoprotein D expression, 726
varicella-zoster virus
detection and frequency analysis, 3463
Cytotoxic T-lymphocyte response
vesicular stomatitis virus nucleoprotein antigen
bm3 mutant recognition decreased, 1992

Defective interfering particles
influenza virus
identification in nature, 1517
protective effect, 1517
interaction with vesicular stomatitis virus
complete resistance to DI particles, 454
Deletion mutants
herpes simplex virus type 1 ICP8 protein
characterization of transformed cell lines, 1136
expression, 1136
Dengue virus
structural and nonstructural proteins
expression by recombinant vaccinia virus, 4019
Densovirus
host-dependent evolution of parvoviruses
homology with parvovirus and dependovirus, 553
organization and sequence, 553
Dependovirus
host-dependent evolution
homology with densovirus and parvovirus, 553
Dephosphorylation
simian virus 40 large T antigen
ATPase and DNA-binding effect, 3373
DNA replication stimulation, 3373
9-(1,3-Dihydroxy-2-propoxymethyl)guanine
dual infection with herpes simplex virus and Epstein-Barr virus
effects of acyclovir and, 607
DNA amplification
human immunodeficiency virus
sequence identification, 1690
simian virus 40 synthesis
herpes simplex virus infection enhancement, 1427
DNA encapsidation
adenovirus type 5 deletion mutants
packaging signal characterization, 2555
repeated sequence element identified, 2555
DNA excision
polyomavirus-mouse hybrid replicon
site-specific recombination event, 840
DNA expression
Epstein-Barr virus immortalization in neonatal B lymphocytes
transforming ability, 1552
DNA extraction
JC virus multiplication
owl monkey tumor cells, 1435
DNA insertion
helper-independent retroviral vectors
adaptor plasmid development, 3004

amino-terminal synthesis, 1
membrane insertion, 1
synthesis in vitro, 1
glycoprotein D expression
cytotoxic T-cell response, 726
vaccinia virus vector, 726
glycoprotein D-specific neutralizing antibodies
penetration inhibition, 3356

glycoprotein E
role in viral infectivity, 600
ICP8 deletion mutants
characterization of transformed cell lines, 1136
expression, 1136
immediate-early gene
regulation by *trans*-acting factors, 190
sequence requirements, 190
immediate-early promoters
expression in HeLa and Vero cells, 2286
response to *trans*-acting factors, 2286
immediate-early protein ICP0 deletion mutants
impaired growth response, 829
immediate-early protein ICP4
transcription start site binding, 858
immunoglobulin G-binding glycoprotein
complex formation with gE, 2208
identification, 2208
inverted repeat sequences of L component
transition to homozygous state, 1187
latently infected mice
transcript detection, 3841
mouse footpad and ear skin virulence
Langerhans cell density role, 2515
mouse age and genetic strain role, 2515
virus strain pathogenicity role, 2515
mutant *vhs*1
stability of immediate-early *alpha* mRNAs, 604
native and recombinant envelope proteins
human immune T-cell response, 1532
N-terminal synthetic peptides of glycoprotein D
antipeptide and group VII monoclonal antibody analyses, 3607
structural properties and reactivity, 3607
ori_L deletion mutants
latency effect in vivo, 3528
replication effect in vitro, 3528
poly(A)$^+$ transcript
expression in trigeminal ganglia of mice, 1700
expression of immediate-early gene IE-1, 1700
rabbit beta-globin clones
cellular gene expression, 2368
shutoff of host cell expression, 2368
rabbit trigeminal ganglia
detection of latency-related viral RNAs, 3820
reactivation from infected trigeminal ganglia of mice
reactivation model, 3288
replication inhibition by novobiocin and coumermycin A_1, 3288
S component
DNA synthesis origin, 3349
open reading frame origin, 3349
simian virus 40 DNA synthesis
amplification, 1427
temperature-sensitive mutants
complementation by varicella-zoster virus, 225
physical mapping of host shutoff loci, 143
TK$^+$ transformants
sequences inhibiting transformation, 2989
transcription initiation sites of ICP8 gene
mapping in infected and transfected cells, 615
US3 open reading frame deletion
growth effect in cell culture, 2896
protein kinase activity, 2896
virion stimulatory protein mRNA leader sequences
transcription and mRNA stability role, 2499
virus-specific glycoprotein species
cell surface expression, 104
flow cytometric analysis, 104
Herpes simplex virus type 1 Patton
glycoprotein gB1
expression in mammalian cells, 315
Herpes simplex virus type 2
aphidicolin-resistant mutants
DNA sequence analysis, 388
asymptomatic infections
detection after vaccination, 264
glycoprotein gB2 gene
structure and expression, 326
glycoprotein gG-2
small-molecular-weight component
cleavage event product, 1735
processing and synthesis, 1735
ICP4-defective mutants
characterization, 1092
isolation, 1092
recurrent infection in guinea pigs
biological activity, 2120
protective immunity regulation, 2120
Herpes simplex virus types 1 and 2
Epstein-Barr virus and cytomegalovirus
cross-reactivity, 1125
intertypic recombinant RS6
genetic and biological analyses, 1978
neurovirulence, 1978
Herpesvirus saimiri
subgroups A, B, and N
immortalization in vitro, 3485
virion protein
Epstein-Barr virus homology, 2063
identification, 2063
Herpesvirus suis
pseudorabies virus Bartha strain
location and identification of nucleocapsid assembly-defective functions, 796
Herpesvirus sylvilagus
glycoproteins gp13 and gp32
antigen identification, 3580
characterization, 3580
neutralization, 3580
Herpesviruses
bovine herpesvirus 1 glycoprotein synthesis
gI and gIV vaccine role, 3292
temporal control characterization, 3292
bovine herpesvirus type 1 latency-related RNA
characterization, 3827
trigeminal ganglia mapping, 3827
bovine herpesvirus type 1 thymidine kinase gene
map location, 4023
equine herpesvirus 1 glycoprotein genes
detection with monoclonal antibodies, 2454
λgt11 expression system, 2454
map locations, 2454
herpes simplex virus type 2
asymptomatic infections postvaccination, 264
human cytomegalovirus DNA-binding protein
purification and gene mapping, 3143
similarity to HSV ICP8, 3143
pseudorabies virus gII and herpes simplex virus type 1 gB genes
homology, 2691
pseudorabies virus mutants lacking glycoprotein gX
replication and virulence, 229
Heterogeneous DNA
Epstein-Barr virus palindrome center
generation, 1495
sequences, 1495
Histocompatibility antigens
human T-cell lymphotropic virus type III
identification, 629
reovirus type 1 Lang
role in transport into bile, 3222
Horizontal transmission
ecotropic murine retroviruses, 1037
Host cell gene expression
herpes simplex virus type 1 beta-globin recombinants
regulation, 2368
Host cell nuclear matrix
simian virus 40
association early in infection, 748
Host cell protein synthesis
poliovirus infection
effect of proteolysis of p220, 986
mechanism of shutoff, 986, 2480
p220 cleavage relationship, 2480
Host shutoff mechanism
herpes simplex virus mutants
function and effects, 2198
mRNA degradation, 2198
HTLV-III/LAV
human colorectal cell lines
productive, persistent infection, 209
Human adenovirus type 2
cell membrane permeability changes
Na^+,K^+-ATPase role, 883
Human adenovirus type 5
early region 1B 176R protein
acylation, 3227
Human cytomegalovirus
DNA polymerase gene
genomic localization, 119
homology with other herpesviruses, 119, 125
sequence and transcription analysis, 119, 125
DNA-binding protein
purification and gene mapping, 3143
similarity to HSV ICP8, 3143
immediate-early region 2 gene products
identification and characterization, 3214
inducible promoter regulation, 3214
large structural phosphoprotein gene pp150
map position, 1358
nucleotide sequence, 1358
transcription analysis, 1358
phosphonoacetic acid-resistant mutants
isolation and characterization, 1291
phosphoproteins pp65 and pp71

nucleotide sequence, 446
primary structure and transcription, 446
Human endogenous retroviruses
HERV-K genome in human tumor cells
expression, 2059
organization, 2059
type C *pol* and *gag* sequences
human T-cell lymphotropic virus homology, 4060
Human hepatitis delta virus
woodchuck hepatocyte cultures
replication, 2891
Human immunodeficiency virus
art gene protein
expression in bacteria, 633
brain-derived cell line
expression, 1244
cell-mediated immune response
characteristics, 2017
conserved domains on envelope glycoproteins
serum neutralizing antibody recognition, 2024
cytopathic effects
biologic behavior in immortalized cells, 1602
cell fusion requirements, 3114
mechanism of cell killing, 3114
strain differences, 1602
envelope glycoproteins
expression by baculovirus vector, 3617
envelope protein sequences
antigenic epitopes in conserved and variable regions, 570
computer-assisted analysis, 570
herpes simplex virus type 1
activation of infection, 3726
histocompatibility antigens
direct identification, 629
human colorectal cell lines
productive, persistent infection, 209
infected T cells
azidothymidine treatment effects, 3769
replication resumption, 3769
infectious molecular clones
persistent productive infection in human glial cells, 3774
methylation of long terminal repeat sequences
modulation of gene expression, 1253
reisolated viruses
persistent infection of chimpanzees, 3173
serological responses and properties, 3173
sequence identification
DNA amplification procedure, 1690
oligonucleotide-based detection, 1690
superinfection of chimpanzee, 4026
T-cell responses by chimpanzees, 3804
T-cell surface receptors
downregulation, 3741
transmembrane glycoprotein
antigenic conformation, 2639
immunodominant domain mapping, 2639
Human lymphoid cells
adenovirus types 2 and 5
productive infection, 1466
Human lymphotropic virus type III
reisolated human immunodeficiency virus
persistent infection of chimpanzees, 3173
serological responses and properties, 3173
Human papillomavirus 1a
L1 and L2 open reading frame proteins
identification, 2793
Human papillomavirus type 1
RNA transcripts from plantar warts
identification and mapping, 1913
R-loop characterization, 1913
Human papillomavirus type 6b
L1 open reading frame protein
antibody detection, 2684
identification in condylomas, 2684
Human papillomavirus type 11
laboratory production in vivo, 590
Human papillomavirus type 16
cervical carcinoma cell lines
structural and transcriptional analysis, 962
DNA sequences in SK-v cells
early event in tumor progression, 3295
integration, 3295
E2 gene product
long control region analysis, 1630
mutational analysis, 1630
transcriptional *trans*-activation, 1630
early protein E7
biochemical properties, 1686
cytoplasmic phosphoprotein identification, 1686
function in cancer development, 1686
human fibroblasts and keratinocytes
transformation, 1061
Human papillomavirus type 18
DNA integration site
localization in cervical carcinoma cell line SW756, 1682
E6 and E7 open reading frames
transforming region localization, 3635
transcriptional promoter
characterization, 134
expression by simian virus 40 and adenovirus, 134
Human papillomavirus types 6 and 11
RNA species characterization
electron microscopic R-loop technique, 2581
identification and mapping, 2581
Human papillomavirus types 6b and 16
L1 open reading frames
antigenic properties, 2389
expression in *E. coli*, 2389
open reading frame proteins
characterization, 1655
DNA-binding activity, 1655
Human parainfluenza virus type 3
fusion and hemagglutinin-neuraminidase glycoproteins
contribution to host immunity, 3416
expression by vaccinia virus vectors, 3416
hemagglutinin-neuraminidase glycoprotein
antigenic structure, 1473
monoclonal antibody selection, 1473
sequence analysis of variants, 1473
Human T-cell leukemia virus type 1
p40x-responsive regulatory sequences
identification, 2175
trans-activation requirements, 2175
Human T-cell leukemia virus type I
$p40^x$ protein
baculovirus expression vector, 708
synthesis in eucaryotic cells, 708
Human T-cell lymphotropic virus
human endogenous retroviruslike genome
evolutionary relationship, 4060
type C *pol* and *gag* sequences, 4060
Human T-cell lymphotropic virus type III
histocompatibility antigens
direct identification, 629
Human T-lymphotropic virus type III
art gene protein
expression in bacteria, 633

ICP8 mutants
herpes simplex virus type 1
characterization of transformed cell lines, 1136
expression, 1136
Immediate-early antigens
murine cytomegalovirus
protective immunity role, 3102
Immediate-early gene 1
murine cytomegalovirus
sequence, 1901
structural organization, 1901
Immediate-early gene 2
human cytomegalovirus
identification and characterization, 3214
inducible promoter regulation, 3214
Immediate-early gene expression
herpes simplex virus type 1 *vhs*1 mutant
stability of *alpha* mRNAs, 604
Immediate-early genes
Epstein-Barr virus expression
P3HR1 superinfection system, 3120
herpes simplex virus
regulation by *trans*-acting factors, 190
sequence requirements, 190
herpes simplex virus effectors
alpha promoter response, 3167
transcriptional activator response, 3167
murine cytomegalovirus
cytolytic T lymphocytes, 2054
host immune response, 2054
location, transcripts, and translation products, 526
Immediate-early IE94 promoters
simian and human cytomegaloviruses
nuclear factor 1-binding sites, 1559
tandem repeat elements, 1559
Immediate-early promoters
herpes simplex virus type 1
expression in HeLa and Vero cells, 2286
response to *trans*-acting factors, 2286
Immediate-early protein ICP0
herpes simplex virus type 1 deletion mutants
impaired growth response, 829
Immediate-early protein ICP4
herpes simplex virus type 1
transcription start site binding, 858
herpes simplex virus type 2 defective mutants
characterization, 1092
isolation, 1092
Immediate-early proteins

pseudorabies virus
binding to single-stranded DNA, 1855
pseudorabies virus mutant
function in early gene transcription, 1258
Immune clearance
lymphocytic choriomeningitis virus
immune therapy, 3920
studies, 3920
lymphocytic choriomeningitis virus effector cells
intercell cooperation, 3930
Immune response
anti-idiotypic antibodies to polyomavirus monoclonal antibody
infection prevention in mouse kidney cells, 2747
duck hepatitis B virus envelope proteins
characterization, 2280
comparison of preS and S proteins, 2280
duck hepatitis B virus-infected ducks
antibody reactivity, 916
equine infectious anemia virus
antigenic variation effect, 3783
role, 3783
herpes simplex virus type 1 envelope proteins
induction in human T cells, 1532
herpes simplex virus type 2
asymptomatic infection postvaccination, 264
human immunodeficiency virus infection
characteristics, 2017
interferon-dependent and -independent replication restriction
genetic resistance, 1875
murine cytomegalovirus infection, 1875
murine cytomegalovirus
nonstructural immediate-early antigen
role, 3102
murine cytomegalovirus immediate-early gene products
cytolytic T-lymphocyte response, 2054
murine leukemia virus
abrogation of resistance, 383
challenge with ectromelia virus, 383
persistent mouse rotavirus infection
animal model, 3345
vaccinia virus 39,000-M_r protein
structure and function, 3910
vaccinia virus recombinants
respiratory syncytial virus gene expression, 3855
Immune serum
Epstein-Barr virus DNA polymerase antiserum
preparation, 3331
rabies virus cell-to-cell spread
effect in vitro, 3314
Immune-stimulating complexes
measles virus H and F glycoproteins
protection, 3896
Immunogenic sites
hepatitis A virus
defined by neutralization escape mutants, 491
Immunogenicity
herpes simplex virus type 1 glycoprotein gB1
expression in mammalian cells, 315
Immunoglobulin A antibodies
Sendai virus infection
protective effect, 2624
Infectious hematopoietic necrosis virus
glycoprotein gene cDNA clone
nucleotide sequence, 1342
Infectious pancreatic necrosis virus
polyprotein, protein, and genome segment A
characterization, 3655
synthesis, 3655
Infectious process
transmissible mink encephalopathy virus
extraneural replication, 3235
temporal distribution, 3235
Influenza A virus
major histocompatibility complex class I-restricted cytotoxic T lymphocytes
nonstructural protein recognition, 1098
polymerase recognition, 1098
reassortant viruses
attenuation for primates, 2857
Influenza A virus (WSN/33 strain)
matrix (M_1) protein
functional and antigenic domains, 239
Influenza virus
B-cell mitogenesis
role of hemagglutinin, 214
defective interfering particles
identification in nature, 1517
protective effect, 1517
functional virus envelopes
membrane and liposome fusion, 2245
reconstitution, 2245
gene expression
control mechanisms, early and late, 764
nuclear-cytoplasmic transport of virus-specific RNAs, 764
inactivated vaccine
antibody induction intragastrically, 2150
hemagglutinin-specific immunoglobulin A synthesis, 2150
lymphocyte homing, 2150
monoclonal antibody-selected antigenic variants
receptor-binding characteristics, 206
N9 neuraminidase
antigenic structure and variation, 2910
polymerase protein complexes in insect cells
expression by baculovirus vectors, 361
polymerase proteins
biosynthesis, intracellular localization, and complex formation, 2217
PB_1 protein expression, 2217
receptor-binding activity of hemagglutinin molecule
antigen-presenting cell activity, 1375
three polymerase proteins
formation of complexes, 16
Initiation sites
herpes simplex virus type 1 ICP8 gene
mapping in infected and transfected cells, 615
int oncogenes
hormone-dependent and -independent mammary tumors
development in GR mice, 1073
int-3 locus
mouse mammary tumor virus integration region
identification, 66
localization on mouse chromosome 17, 218
Interferon
adenovirus type 12 early region 1A
induction, 2326
stimulatory function, 2326
coinfection by adenovirus and vesicular stomatitis virus
modulation by early region 1A, 787
treatment effects, 787
murine cytomegalovirus infection
genetic resistance, 1875
replication restriction, 1875
RD-114 clonal derivatives
different antiviral and gene-inducing responses, 2727
Sendai virus
induction by transfection of *C* gene cDNA, 625
subacute sclerosing panencephalitis model
pathogenic role, 1919
vesicular stomatitis and encephalomyocarditis viruses
expression in RD-114 cells, 1524
treatment effects, 1524
vesicular stomatitis virus infection in mice
mechanism for natural resistance, 812
vesicular stomatitis virus transcription inhibition, 653
v-*mos*-induced transformation
expression inhibited, 2567
retroviral RNA down regulation, 2567
treatment effect, 2567
Interferon synthesis
cytomegalovirus immediate-early IE94 promoter
stimulation by herpes simplex virus, 819
Intra-axonal transport
Borna disease virus pathogenesis
incubation period, 3431
route for virus dissemination, 3431
Intracellular transport
spleen focus-forming virus gp52 with altered membrane domain
leukemogenic effect, 4007
Intracisternal A particle genome
adenovirus type 12 DNA insertion
integration in hamster cells, 2719
Intracisternal A particles
MIA14 mouse provirus
comparison with other retroviruses, 3020
nucleotide sequence, 3020
Inverted repeat sequences
herpes simplex virus type 1 L component
transition to homozygous state, 1187
Invertible long component
pseudorabies virus vaccine strain Norden
evolution, 1772
growth advantage in chicken embryo fibroblasts, 1772
IV_{a2} promoter
adenovirus type 2 mutants
RNA synthesis regulation, 646
transcription factor identification, 646

JC virus
owl monkey tumor formation

multiplication in explanted cells, 1435
transformed human fetal glial cells
permissivity increased, 755
JHM virus
adenylate cyclase system influence
demyelinating disease models, 3795
expression activation, 3795

Kirsten murine sarcoma virus
synthesis of viral proteins
expression in *Escherichia coli*, 302

L protein expression
vesicular stomatitis virus
homotypic and heterotypic exclusion, 3133
La Crosse virus
cryoelectron microscopic technique
structural features, 2319
S-mRNA synthesis
in vitro translational requirement, 87
in vivo translational requirement, 96
translational requirement model, 3960
S-mRNA transcripts
nucleocapsid assembly sites, 667
λgt11 expression system
equine herpesvirus 1 glycoprotein genes
detection with monoclonal antibodies, 2454
map locations, 2454
Large T antigen
polyomavirus
expression by baculovirus vector, 1712
polyomavirus phosphorylated subclasses
measurement, 2336
nuclear association, 2336
polyomavirus phosphorylations
localization, 1155
polyomavirus-mouse hybrid replicon
RmI resolution function, 845
simian virus 40
cellular secretory pathway role, 3950
DNA replication increased, 3373
DNA-binding activity, 2076
oligomerization, 2076
phosphatase treatment effect, 3373
synthesis and processing, 3950
tumor formation in transgenic mice, 2029
simian virus 40 cytoplasmic-localization mutant pSVCT3
transformation of precrisis human cells, 3521
simian virus 40 DNA replication
monoclonal antibody probes, 411
simian virus 40 infection
subnuclear distribution analysis, 3561
simian virus 40 mutant
trans-activation of cellular and viral promoters, 1296
simian virus 40 origin binding
ATP enhancement of DNA replication, 3649
simian virus 40 origin-specific
DNA-binding domain analysis, 3326
simian virus 40 *trans*-dominant defective mutants
characterization, 436
simian virus 40-transformed human cells
spontaneous mutant expression, 2864
Large-T-antigen mutant
simian virus 40
oligomeric forms, 940
p53 complex formation, 940
Large-T-antigen phosphorylation
polyomavirus
effects of viral mutations and cell growth state, 1147
Late gene expression
bacteriophage P22
lacZ gene fusion, 3621
regulation, 3621
vaccinia virus
regulation, 639
Late gene transcription
polyomavirus-transformed rat cells
reiterated leader sequence function, 4055
Latency disruption
Epstein-Barr virus polymorphic proteins
BZLF1 role, 3672
Latency-related RNAs
bovine herpesvirus type 1
trigeminal ganglia mapping, 3827
Latent infection
herpes simplex virus
nerve growth factor deprivation effect, 2311
herpes simplex virus type 1 in rabbits
latency-related viral RNA detection, 3820
herpes simplex virus type 1 ori_L deletion mutants
establishment and reactivation effect, 3528
herpes simplex virus type 1-infected mice
transcript detection, 3841
Latent membrane protein
Epstein-Barr virus-encoded p63/LMP
processing, 2100
Leader RNA synthesis
vesicular stomatitis virus replication
cytopathogenicity in *Drosophila* cells, 1391
Lentiviruses
visna virus transcriptional pattern
significance, 1325
Leukemogenicity
Friend-mink cell focus-forming and Moloney murine leukemia viruses
enhancer sequence roles, 1861
murine retroviral long terminal repeats
transcriptional tissue specificity, 1067
Lymphadenopathy-associated virus
reisolated human immunodeficiency virus
persistent infection in chimpanzees, 3173
serological responses and properties, 3173
Lymphadenopathy-associated virus type 1
human immunodeficiency virus type ARV-2
chimpanzee superinfection, 4026
Lymphocytic choriomeningitis virus
clearance mechanism studies
cooperation between cells, 3930
GP-C glycoproteins
cleavage site conservation, 982
definition by site-specific antibodies, 982
immune therapy of persistent infection
clearance mechanism studies, 3920
Lyt-2$^+$ T lymphocytes
antiviral antibody response, 1867
recovery mechanism, 1867
T-cell response, 1571
Lymphoma incidence
ecotropic and mink cell focus-forming viruses
susceptibility of AKXD recombinant inbred mice, 2929
Lysosomotropic drugs
reovirus outer capsid proteins
NH_4Cl effect on viral growth, 2351

Macrophage-resistant cells
simian virus 40-transformed fibroblasts
gp70 expression, 928
Major capsid antigen VP6
simian rotavirus SA11 recombinant baculovirus expression system, 1488
synthesis and immunogenicity, 1488
Major capsid protein VP1
polyomavirus genome
modification by tyrosine sulfuration, 1708
Major histocompatibility complex class I
adenovirus type 35 antigen-binding glycoprotein
characterization, 3665
anti-influenza virus cytotoxic T lymphocytes
nonstructural protein recognition, 1098
polymerase recognition, 1098
Major histocompatibility complex class II
simian immunodeficiency virus
expression in vitro, 1421
Marek's disease herpesvirus
gene encoding A antigen polypeptide
identification, 2614
Mason-Pfizer monkey virus
myristylation mutation
role in intracellular transport and assembly, 1045
Matrix (M_1) protein
influenza A virus (WSN/33 strain)
functional and antigenic domains, 239
Measles virus
B-cell cycle of infection
immunoglobulin secretion block, 3441
sequence of events, 3441
H and F glycoproteins
protection by immune-stimulating complexes, 3896
membrane protein mRNA
selective inhibition of translation, 472
phosphoprotein and matrix protein
structure and function of bicistronic RNA, 584
ribonucleoprotein complexes
RNA synthesis analysis, 3381
transcription system, 3381
subacute sclerosing panencephalitis model
interferon resistance, 1919
pathogenesis, 1919
Medium T antigen
polyomavirus proteins
interactions, 3902
Membrane antigen
Epstein-Barr virus
herpesvirus saimiri homology, 2063
identification, 2063

Membrane protein
measles virus mRNA translation
restricted synthesis, 472
Membrane protein BNLF-1
Epstein-Barr virus
expression in transformed cells, 866
posttranslational processing, 866
Methylation patterns
adenovirus type 2 E2A promoter
gene expression, 3710
stability, 3710
3-Methylquercetin
poliovirus RNA replication
inhibition selectively, 3319
MIA14 mouse provirus
intracisternal A-particle genome
comparison with other retroviruses, 3020
nucleotide sequence, 3020
Middle surface protein
hepatitis B virus
antibodies to pre-S and S epitopes, 1286
expression by vaccinia virus recombinant, 1286
Middle T antigen
adenovirus expression system
characterization, 1221
dihyrofolate reductase expression, 1213
adenovirus vector
overproduction, 1226
polyomavirus transformation
cooperation with small T antigen, 2253
polyomavirus transformation-defective mutant
association with 73-kilodalton heat shock protein, 405
polyomavirus-transformed cell lines
transcription changes, 2448
polyomavirus-transformed rat cells
analysis, 3299
pp60$^{c\text{-}src}$ interactions, 3299
polyomavirus-transformed variants
characterization, 1079
pp60$^{c\text{-}src}$ expression, 1079
Middle-T binding site
polyomavirus
mapping interactions with pp60$^{c\text{-}src}$, 285
Mill Hill 2 virus
v-*mil* oncogene
fibroblast transformation parameters, 1717
homology with v-*raf*, 1717
v-*mil* sequences
propagation in vivo or in vitro, 1949
Mink cell focus-forming murine leukemia viruses
AKXD recombinant inbred mice
characterization, 2929
lymphoma susceptibility, 2929
virus-related transcripts
expression in AKR mice, 876
xenotropic virus and proviral genes
env gene probes, 3082
wild mouse origins, 3082
Mitogenic activity
influenza virus
role of hemagglutinin, 214
Rous sarcoma virus mutant *dl*PA105
cell-type-specific response, 2530
p45$^{v\text{-}src}$ protein isolation, 2523
tumorigenic properties, 2530
Rous sarcoma virus p60$^{v\text{-}src}$ domains
investigation, 1678
Moloney and Friend murine leukemia viruses
U_3 region sequences
disease specificity determinants, 693
Moloney murine leukemia virus
Dsi-1 frequent integration region
isolation from rat thymomas, 1164
embryonal carcinoma cell system
gene expression, 2742
sequence element mediation, 2742
env message
cDNA clone sequence, 2038
splice acceptor site, 2038
Friend-mink cell focus-forming virus recombinants
enhancer sequence roles, 1861
leukemogenicity, 1861
gag region synthesis
packaging signal involvement, 1639
long terminal repeat
role in Abelson virus-induced lymphoma, 3266
long terminal repeat recombinants
tissue-specific replication, 1350
long terminal repeats
DNase I-hypersensitive site analysis, 1368
significance, 1368
myeloid tumors in BALB/c mice
c-*myb* activation requirement, 3721
v-*abl* involvement lacking, 3721
promoter sequences
expression in embryonal cells, 3248
proviral integration sites
DNase-hypersensitive chromatin, 336
integration and structure, 336
replication-defective mutants
endonuclease activity characterization, 1756
retroviral vector internal viral sequences
effect, 1647
utility, 1647
RNase H activity
plus-strand primer formation, 2843
Moloney murine sarcoma virus
v-*mos* gene expression
biological and biochemical analysis, 3625
P55 and vimentin identification, 3625
Monoclonal antibodies
anti-idiotypic antibodies to polyomavirus monoclonal antibody
infection prevention in mouse kidney cells, 2747
bovine virus diarrhea virus clones
bovine enterovirus-3 inhibition, 2050
cellular p220 in poliovirus-infected cells
characterization, 2702
distribution and conformer identification, 2702

sequence and translation, 3968
Mouse hepatitis virus A59
glycoprotein E1
Golgi region localization, 2042
structural protein N
replication in vitro, 1814
virus-binding activity
genetic resistance, 185
Mouse mammary tumor virus
hormone-dependent and -independent tumors
activation of *int* oncogenes, 1073
development in GR mice, 1073
integration region *int-3*
localization on mouse chromosome 17, 218
long terminal repeat
expression in transgenic mice, 3013
simian virus 40 marker gene, 3013
nomenclature proposed, 1651
recombinant DNA clones
comparison with other retroviruses,

480
nucleotide sequence, 480
Mouse mammary tumor virus (Czech II)
tumorigenesis in feral mice
int-3 locus identification, 66
mRNA cap site
herpes simplex virus type 1 leader sequences
transcription and stability role, 2499
mRNA degradation
herpes simplex virus mutants
function and effects, 2198
host shutoff mechanism, 2198
mRNA expression
ERV3 human endogenous retrovirus
sequence analysis, 2182
mRNA induction
interferon treatment
expression in RD-114 cells, 1524
mRNA metabolism
adenovirus type 5 ribonucleoproteins
association with hnRNA in infected cells, 3276
mRNA processing
adenovirus E3 region deletion mutants
deleted sequence function, 3938
role, 3938
mRNA sequence
infectious hematopoietic necrosis virus
cDNA clone
comparison of vesicular stomatitis virus and rabies virus sequences, 1342
glycoprotein gene sequence, 1342
mRNA species
bovine papillomavirus type 1 transforming region
processing sites, 2240
promoters, 2240
mRNA splicing
Rous sarcoma virus *env* and *src* genes
efficiency of noncoding region, 177
mRNA synthesis
influenza virus polymerase proteins
complex formation in insect cells, 361
expression by baculovirus vectors, 361
role of nucleocapsid protein complexes, 16
simian virus 40 mutant
agnoprotein production, 2331
translation initiation effect, 2331
vesicular stomatitis virus
inhibition by interferon, 653
mRNA transcript
herpes simplex virus type 1
immediate-early gene IE-1 expression, 1700
mRNA transcription
La Crosse virus S genome
nucleocapsid assembly sites, 667
mink cell focus-forming murine leukemia virus-related transcripts
expression in AKR mice, 876
visna virus
expression pattern, 1325
mRNA translation
measles virus membrane protein
selective inhibition of translation, 472
poliovirus-induced host cell shutoff
in vitro model, 2480
p22 cleavage relationship, 2480
reovirus sigma 3 protein role, 2472
Mucociliary transport polymorphism
Sendai virus lethal infection
linkage to resistance/susceptibility, 1670
Muramidase
bacteriophage Cp-1 lysin
biochemical characterization, 2573
cloning and purification, 2573
Murine cytomegalovirus
adoptive cellular immunity
modification of adrenalitis, 23
immediate-early gene 1
sequence and structural organization, 1901
immediate-early gene products
cytolytic T-lymphocyte recognition, 2054
host immune response, 2054
immediate-early genes
location, transcripts, and translation products, 526
interferon-dependent and -independent replication restriction
genetic resistance, 1875
nonstructural immediate-early antigen
protective immunity role, 3102
peritoneal macrophage infection
comparative study, 3602
H-2-determined sensitivity, 3602
Murine leukemia provirus
germ line integration into retroviruslike sequence
long terminal repeat analysis, 701
sequence analysis, 701
Murine leukemia virus
Akvr-1 restriction gene
characterization, 308
challenge with ectromelia virus
abrogation of resistance, 383
class II polytropic MuLVs
class I generation, 1882
role, 1882
envelope glycoprotein processing
Arg-to-Lys mutation role, 2852
integration-deficient mutant
oligomeric retroviral DNA integration, 1964
ras-containing isolates
biologic and molecular characterization, 2109
comparison with other *ras* oncogenes, 2109
retroviral insertion in c-*myb* gene
myeloid cell line derivation, 2339
truncation, 2339
retroviral long terminal repeats
transcriptional tissue specificity, 1067
transcriptional control region
glucocorticoid regulation, 269
viral enhancer region, 269
Murine leukemia virus-related endogenous proviruses
classification
recombination potential, 2659
structural relationships, 2659
Murine mink cell focus-forming virus
env gene linked to *Rcmf* locus
identification of two forms, 29
Murine monocytic leukemia cell lines
c-*myb* gene rearrangement
induction, 2754
RNA species characterization, 2754
Mus germ line
amphotropic *env*-specific proviral DNAs
lack of genetic transmission, 2225
Mutants
herpes simplex virus type 1 glycoprotein E
role in infectivity, 600
Mutational analysis
bovine papillomavirus type 1 open reading frame E4
biological activities, 1248
late gene expression, 1248
Mutations
poliovirus type 3 recombinant
neurovirulence model in mice, 2917
myb oncogenes
c-*myb* gene insertion
murine leukemia virus truncation, 2339
myeloid cell line derivation, 2339
myb RNAs
retroviral insertion in murine monocytic leukemias
altered transcript induction, 2754
characterization, 2754
c-*myb* rearrangement, 2754
myc oncogene
feline leukemia virus variant
activity in early-passage cells in vitro, 3072
transforming potential, 3072
myc transformation
avian myelocytomatosis virus MC29
characterization, 2138
quail macrophage transformation, 2138
myc-associated proviruses
5′ long terminal repeat impairments
avian leukosis virus tumors, 2489
Mycoplasma viruses L2 and L2*ins1*
DNA replication origins and termini mapping, 1909
Myeloid cell lines
c-*myb* gene insertion
derivation, 2339
murine leukemia virus truncation, 2339
Myeloproliferative leukemia virus
acute leukemogenic replication-defective retrovirus
genetic analysis, 579
Myeloproliferative sarcoma virus
temperature-sensitive mutants
activity, 889
mos oncogene point mutation, 889
Myristylation
D-type retrovirus capsids
required for intracellular transport, 1045
Myxoma virus
epidermal growth factor and transforming growth factor alpha genes
mapping and sequencing, 1271

N9 neuraminidase
influenza virus
antigenic structure and variation, 2910
monoclonal antibody inhibition, 2910
Na^+,K^+-ATPase
adenovirus-dependent cell membrane permeability changes
role, 883
Natural killer cells
adenovirus type 2-transformed cells
lysis, 2155

tumor susceptibility of athymic rodents, 2155
adenovirus types 2 and 5 E1A gene products
cytolytic susceptibility, 3510
Friend virus-induced erythroleukemogenesis
stem cell suppression, 2631
Neomycin
herpes simplex virus type 1
polypeptide inhibition, 3388
receptor-binding effect, 3388
Neoplastic diseases
avian leukosis virus subgroup F recombinants
induction, 1203
sequence identification, 1203
Nerve growth factor
herpes simplex virus
latency in vitro, 2311
Neurovirulence
herpes simplex virus types 1 and 2 intertypic recombinant RS6
genetic and biological analyses, 1978
Neutralizing antibodies
human immunodeficiency virus
conserved domains
recognition, 2024
respiratory syncytial virus infection in cotton rats
parenteral treatment effect, 1851
topical treatment effect, 1851
Neutralizing regions
feline leukemia virus envelope gene
anti-synthetic peptide antibodies, 8
Nickel-induced revertants
retroviral gene expression
characterization, 2378
NK24 virus
chicken c-*fos* proto-oncogene
cloning, 4012
nucleotide sequence and analysis, 4012
v-*fos* oncogene
characterization, 3733
Nomenclature
endogenous mouse mammary tumor viruses, 1651
Noncapsid proteins
parvovirus B19
characterization, 2627
5′ Noncoding region
poliovirus type 1 Sabin strain mutants
replication function, 1478
Nonstructural proteins
bluetongue virus NS2 protein
phosphorylation and purification, 3589
single-stranded RNA affinity, 3589
bovine parvovirus
homology with NS-1 proteins of other autonomous parvoviruses, 3612
identification, 3612
dengue virus proteins
expression by recombinant vaccinia virus, 4019
feline panleukopenia virus
expression in *E. coli*, 621
multiple forms in infected cells, 621
parvovirus H-1 *trans*-activation
cytotoxic expression, 1448
genetic switch construction, 1448
Novobiocin and coumermycin A_1
herpes simplex virus type 1-infected mouse cells
reactivation inhibition, 3288
Nuclear antigen complex
Epstein-Barr virus
DNA-binding site, 465
high concentration dependence, 465
Nuclear antigen EBNA 2
Epstein-Barr virus
B-cell growth phenotype influence, 1310
Nuclear antigen EBNA3
Epstein-Barr virus gene
mapping, 3340
overexpression by using adenovirus vector, 3340
Nuclear antigen EBNA-5
Epstein-Barr virus multiple antigen species
monoclonal antibody detection, 3870
Nuclear localization
simian virus 40 VP2 and VP3 polypeptides
identification of sequence role, 3862
Nuclear matrix
adenovirus replication
alterations in structure, 1007
Nuclear phosphoprotein
bovine leukemia virus X region
expression, 1577
Nuclear proteins
adenovirus type 2 E1a region
differential localization, 247
Epstein-Barr virus bicistronic mRNA
identification and analysis, 945
herpes simplex virus ICP4
localization, 276
Nucleocapsid assembly
La Crosse virus
S-mRNA transcripts, 667
pseudorabies virus Bartha strain
location and identification of defective genomes, 796
Nucleocapsid protein gene
vaccinia viruses carrying respiratory syncytial virus N gene
transcription and translation products, 2885
vaccine efficacy, 2885
Nucleocapsid structure
bacteriophage ϕ6
RNA segment analysis, 2362
Nucleoprotein antigen
anti-vesicular stomatitis virus cytotoxic T lymphocytes
bm3 mutant recognition, 1992
Nucleoprotein gene
avian influenza virus reassortants
attenuation for primates, 2857
Nucleoside triphosphate phosphohydrolase I
vaccinia virus gene
identification, 1738

Octyl-β-D-glucopyranoside
polyomavirus receptor moieties
extraction from mouse kidney cell surfaces, 375
2′,5′-Oligoadenylate
encephalomyocarditis virus-infected mice
accumulation, 1586
Oligomer cleavage
human immunodeficiency virus
sequence identification, 1690
Oncogene chimera
v-*erbB*/*src* fusion polypeptide
analysis, 1938
biochemical and biological properties, 1938
Oncogene expression
Abelson murine leukemia virus lymphomagenesis
clonal dominance and progression, 2192
murine gamma interferon treatment
v-*mos*-induced transformation inhibition, 2567
Oncogenes
gag-erbB fused gene
transforming ability, 1665
Kirsten murine sarcoma virus
expression in *Escherichia coli*, 302
synthesis of viral proteins, 302
Orbiviruses
bluetongue virus
genome segment reassortment, 2670
ori_L deletion mutants
herpes simplex virus type 1
latency effect in vivo, 3528
replication effect in vitro, 3528
Ovine lentiviruses
replication and cytopathic effects
pathogenicity correlation in vivo, 4038

P38 promoter
parvovirus H-1
tar element characterization, 2807
trans-activation, 2807
$p40^x$ protein
human T-cell leukemia virus type I
baculovirus expression vector, 708
synthesis in eucaryotic cells, 708
p40x gene product
human T-cell leukemia virus type 1 long terminal repeat
regulatory sequence identification, 2175
trans-activation requirements, 2175
$p45^{v\text{-}src}$ protein
Rous sarcoma virus mutant *dl*PA105
cell-type-specific response, 2530
characterization and sequence, 2523
isolation, 2523
tumorigenic properties, 2530
$p48^{v\text{-}myb}$ expression
avian erythroblastosis virus-transformed erythroblasts
effect on c-*myb* expression, 3284
$p48^{v\text{-}myb}$ transformation
avian myeloblastosis virus deletion mutant
env-encoded residue unnecessary, 933
p53 oncogene
multistage Friend erythroleukemia
genomic rearrangements, 2777
independent origin of tumor clones, 2777
$p60^{v\text{-}src}$ domains
Rous sarcoma virus
mitogenic activity, 1678
myristylation, 1678
p63/LMP protein
Epstein-Barr virus
processing, 2100
p220 cleavage
poliovirus proteinase 2A

eucaryotic initiation factor 4F alteration, 2711
translation in vitro, 2711
p220 polypeptide
subcellular distribution in poliovirus-infected cells
conformer identification, 2702
monoclonal antibody-aided characterization, 2702
Packaging specificity
reticuloendotheliosis virus/murine leukemia virus recombinant vectors
characterization, 2675
replication enhancement effect, 2675
Papillomaviruses
bovine papillomavirus proteins
analysis, 3596
bovine papillomavirus type 1
mutational analysis of 3' ORFs, 3889
RNA levels and protein expression, 2924
tumorigenicity in hamster cells, 2924
bovine papillomavirus type 1 E region promoters
identification, 2240
processing sites, 2240
cottontail rabbit papillomavirus E6 polypeptides
early region transcription, 2938
identification, 2938
enhancers and E2 transcriptional factors
identification, 2599
human papillomavirus 1a late proteins
identification, 2793

herpes simplex virus type 1 US3 deletion
effect in cell culture, 2896
pk gene function, 2896
Proteinase 3C
poliovirus mutants
RNA polymerase synthesis deficiency, 2162
site-directed mutagenesis, 2162
Proto-oncogenes
mouse mammary tumor virus (Czech II)-induced tumors
int-3 locus identification, 66
Pseudorabies virus
attenuated vaccine strain (Norden)
growth advantage in chicken embryo fibroblasts, 1772

invertible long component, 1772
gII gene
homology with herpes simplex virus type 1 gB gene, 2691
glycoprotein gIII
localization and modification, 2962
mutants with unique *Eco*RI sites, 2962
glycoprotein gp50 as a subunit vaccine
evaluation, 3977
immediate-early protein
adenovirus type 5 E1A coinfection, 1103
binding to single-stranded DNA, 1855
transcription of class II and class III genes, 1103
immediate-early protein function
role in early gene transcription, 1258
mutants lacking glycoprotein gX
replication and virulence, 229
ribonucleotide reductase
biochemical properties, 2046
viral polypeptide identification, 2046
structural glycoprotein
virulence role, 4030
Pseudorabies virus Bartha strain
glycoprotein gI
role in virus release, 2764
nucleocapsid assembly-defective functions
location and identification of genome, 796
ptg mutations
bacteriophage T4
DNA sequence analysis, 2828
localization in gene 23, 2823
phenotypes, 2835

Rabies virus
cultured rat sensory neurons
axonal transport in vitro, 2733
in vitro cell-to-cell spread
antiglycoprotein monoclonal antibody inhibition, 3314
immune serum effect, 3314
ras-containing murine leukemia viruses
murine sarcoma virus isolates
biologic and molecular characterization, 2109
comparison with other *ras* oncogenes, 2109
RD-114 cell line
clonal derivatives
different antiviral and gene-inducing responses, 2727
interferon response, 2727
Reassortment
bluetongue virus
genotypic analyses, 2670
occurrence, 2670
bluetongue virus serotypes 10 and 17
mixed infection in sheep, 1086
rotaviruses from immunodeficient host
heterogeneity of genome rearrangements, 3365
Recombinant interleukin-2
herpes simplex virus type 2 infection in guinea pigs
biological activity with drugs, 2120
protective immunity regulation, 2120
Regulatory genes
Autographa californica nuclear polyhedrosis virus
expression, 2091
sequence, 2091
Regulatory regions
polyomavirus mutants
effects on growth, 1615
replicative *cis*-advantage, 1615
Rous sarcoma virus *env* and *src* genes
splicing efficiency, 177
vaccinia virus late promoter
DNA replication, 75
vesiculoviruses
genome RNA terminus conservation and diversity, 200
Regulatory sequences
human T-cell leukemia virus type 1 long terminal repeat
identification, 2175
p40x *trans*-activation, 2175
simian virus 40 late promoter
characterization, 167
Reindeer papillomavirus
E5 region
characterization, 3394
comparison with other papillomaviruses, 3394
transforming properties, 3394
Reovirus type 1 Lang
major histocompatibility complex class II antigen
transport into bile, 3222
Reovirus type 3
sigma 3 protein
translation in infected L cells, 2472
Reovirus type 3 (Dearing)
sialylated glycoproteins
attachment protein mediation, 1407
binding inhibition, 1407
sigma 1 protein
composition, 1834
multimeric form identified, 1834
Reoviruses
bluetongue virus
genome segment reassortment, 2670
outer capsid protein digestion
infectious cycle role, 2351
NH_4Cl effect, 2351
Replication-defective retrovirus
myeloproliferative leukemia virus
genetic analysis, 579
Respiratory syncytial virus
neutralizing antibody treatment
parenteral treatment effect, 1851
topical treatment effect, 1851
recombinant vaccinia virus vectors
F protein expression, 293
protection of vaccinated mice, 293
subgroups A and B
antigenic relatedness of F and G glycoproteins, 3163
vaccinia virus recombinant-conferred protection, 3163
vaccinia virus recombinant vaccine
immune and histopathological responses, 3855
vaccinia viruses carrying the N gene
transcription and translation products, 2885
vaccine efficacy, 2885
Reticuloendotheliosis virus
B-lymphoma induction
c-*myc* activation, 2084
mutated chicken syncytial virus provirus, 2084
recombinant murine leukemia virus vectors
packaging specificity, 2675
replication enhancement effect, 2675
Retrotransposons
endogenous retrovirus
3′ long terminal repeat as transcription promoter, 1261
$tRNA^{Pro}$ primer-binding site
characterization, 2071
synthetic oligonucleotide probe, 2071
Retroviral DNA integration
murine leukemia virus integration-deficient mutant
oligomeric form, 1964
Retroviral gene expression
nickel-induced revertants
characterization, 2378
Retroviral insertions
c-*myb* gene in murine monocytic leukemias
RNA species characterization, 2754
transcript rearrangement, 2754
Retroviral loci
murine leukemia virus
characterization of *Akvr-1* restriction gene, 308
Retroviral oncogenes
feline c-*fes*/*fps* proto-oncogene
comparison with related oncogenes, 2009
structure, 2009
Retrovirus expression vector
$pp60^{c\text{-}src}$ cloning
expression, 1731
Retrovirus integration
Moloney murine leukemia virus
DNase-hypersensitive chromatin, 336
proviral integration sites, 336
Retrovirus packaging signal
Moloney murine leukemia virus vectors
gag region inclusion, 1639
Retrovirus recombination
Rous sarcoma virus packaging mutant TK15 variants
analysis, 3209
Retrovirus vectors
F9 embryonal carcinoma cells
gene expression, 3248
human proα1(I) collagen gene
Mov-13 mouse strain model, 2549
type I collagen-deficient phenotype rescue, 2549
internal viral sequences
effect on utility, 1647
large direct repeats
deletions, 925
Rous sarcoma virus adaptor plasmids
DNA insertion simplified, 3004
Retroviruses
interferon action in RD-114 clonal derivatives
different antiviral and gene-inducing responses, 2727
Moloney murine leukemia virus vectors
embryonal carcinoma cell gene expression, 2742
sequence element mediation, 2742
$tRNA^{Pro}$ primer-binding site
characterization, 2071
homologous sequences, 2071
synthetic oligonucleotide probes, 2071
Retroviruses, avian
pol protein processing

identification of new *pol* domain, 534
Retroviruses, murine
horizontal transmission, 1037
murine leukemia virus transcriptional control region
glucocorticoid regulation, 269
viral enhancer region, 269
Reverse transcriptase
avian sarcoma and leukosis viruses
pol protein processing, 534
Ribavirin
foot-and-mouth disease virus infection in vitro
curing of persistent infection, 233
Ribonucleoprotein complexes
adenovirus type 5-infected HeLa cells
mRNA and hnRNA association, 3276
measles virus RNA
synthesized product characterization, 3381
transcription system, 3381
Ribonucleotide reductase activity
pseudorabies virus
biochemical properties, 2046
RNA expression
Epstein-Barr virus gene expression
P3HR1 superinfection system, 3120
RNA packaging
ground squirrel hepatitis virus polyribosomes and core particles
influence of 5′-terminal sequences, 35
RNA polymerase
bacteriophage Xp10 genome
rifampin-resistant transcription, 1695
modification of IIO subspecies
poliovirus infection, 1002
poliovirus
characterization of product RNAs, 611
chromatography on hydroxylapatite or poly(U) Sepharose, 611
vaccinia virus DNA-dependent subunits
analysis, 1765
localization, 1765
vaccinia virus temperature-sensitive mutants
characterization, 1842
DNA-dependent subunit, 1842
RNA polymerase activity
West Nile virus nonstructural protein NS5
dissociation in vitro, 3641
role in synthesis, 3641
RNA polymerase-binding proteins
bacteriophage T4
gene identification, 597
identification of two new genes, 366
RNA polymerase-binding sites
bacteriophage S13 replicative form I DNA
localization, 2297
restriction enzyme cleavage site protection, 2297
RNA pregenome
hepatitis B virus replication strategy
5′-end determination, 904
RNA replicase
conserved segment of coliphage QB β-subunit protein
function, 3946
interference with viral infection, 3946
RNA replication
mouse hepatitis virus A59
replication in vitro, 1814
poliovirus snapback double-stranded RNA
analysis, 2307
poly(A) deficiency, 2307
RNA synthesis
adenovirus type 2 IV_{a2} promoter deletion mutants
interaction, 646
transcription factor identification, 646
hepatitis B virus replicative intermediate
retroviral vector, 2921
transfected murine fibroblasts, 2921
influenza virus gene expression
control mechanisms, early and late, 764
nuclear-cytoplasmic transport, 764
poliovirus replication
3-methylquercetin selective inhibition, 3319
poliovirus RNA polymerase
host factor-induced template modification, 802
poliovirus type 1 crude replication complexes
in vitro analysis, 2816
molecular genetic approach, 2816
rotaviruses
plus- and minus-strand transcription and replication, 3479
vesicular stomatitis virus leader RNAs and mRNAs
ATP concentration effect, 3470
RNA terminal sequences
vesiculoviruses
genome conservation and diversity, 200
RNA transcription
Autographa californica nuclear polyhedrosis virus protein genes
divergent transcription, 2264
*Hin*dIII-K significance, 2264
bovine leukemia virus *trans*-acting factor
cis-acting response element interaction, 2462
hepatitis B virus core, X, and S antigens
expression, 1108
RNA transcripts
hepatitis A virus cDNA
infectivity in cell culture, 3035
human papillomavirus type 1 plantar wart isolates
identification and mapping, 1913
R-loop characterization, 1913
RNA translation
encephalomyocarditis virus
cDNA hybridization effects, 2033
poliovirus proteinase 2A
eucaryotic initiation factor 4F polypeptide p220 cleavage, 2711
RNA3 amplification
brome mosaic virus intercistronic and terminal sequences
deletion analysis, 1457
RNA-dependent RNA polymerase
poliovirus replicase
primer-dependent synthesis, 2997
RNase H activity
Moloney murine leukemia virus plus-strand primers
heterogeneity in vitro, 2843
role in formation, 2843
Rotaviruses
heterogeneity of genome rearrangements
isolation from immunodeficient host, 3365
human rotavirus VP3 protein
antigenic variant analysis, 1726
cross-reactive neutralization epitopes, 1726
monoclonal antibody analysis, 1726
major capsid antigen VP6
baculovirus expression system, 1488
synthesis and immunogenicity, 1488
mice with severe combined immunodeficiency
animal model, 3345
persistent infection, 3345
plus- and minus-strand RNAs
synthesis in infected cells, 3479
Rous sarcoma virus
antisense RNA clones
replication inhibition, 921
cis-acting elements in Prague A strain *gag* gene role in transformation, 3401
localization, 3401
env and *src* gene mRNA
splicing efficiency, 177
env gene expression
simian virus 40 late-region-replacement vector, 1276
upstream initiation codon effects, 1276
envelope glycoproteins gp85 and gp37
intracellular transport and assembly analysis, 2981
transmembrane and cytoplasmic domain roles, 2981
glycoproteins gp85 and gp37
cleavage site mutations, 1609
processing blocked, 1609
helper-independent retroviral vectors
adaptor plasmid development, 3004
DNA insertion simplified, 3004
morph^{r} mutants
nucleotide sequence analysis, 1893
v-*src* lesion localized, 1893
mutant *dl*PA105
cell-type-specific response, 2530
characterization and sequence, 2523
p45$^{v\text{-}src}$ protein isolation, 2523
tumorigenic properties, 2530
p60$^{v\text{-}src}$ domains
membrane-binding domain, 1678
mitogenic activity, 1678
myristylation, 1678
p60$^{v\text{-}src}$ temperature-sensitive mutants
effects, 354
packaging mutant TK15 virus-nonproducing variants
analysis, 3209
frequent segregation, 3209
pp60$^{v\text{-}src}$, pp70$^{v\text{-}fer}$, and pp90$^{v\text{-}yes}$ tyrosine kinase activity
monoclonal antibody inhibition, 1927
pp60$^{v\text{-}src}$ transforming protein variants
forms, 1593
transcriptional control elements
characterization, 1171
expression, 1171
Ruminant lentiviruses
replication and cytopathic effects
pathogenicity correlation in vivo, 4038

S protein
duck hepatitis B virus envelope proteins

biochemical and immunological characterization, 2280
comparison with preS protein, 2280
SA11 rotavirus
plus- and minus-strand RNAs
synthesis in infected cells, 3479
VP7 glycoprotein gene
expression in vaccinia virus, 1054
serotype-specific neutralizing antibodies, 1054
Scrapie prions
inactivation by UV irradiation
resistance to, 159
Scrapie-associated fibrils
protease-resistant proteins
antibody response in mice, 3688
immunodecoration, 42
Semliki Forest virus
structural polyprotein
processing, 1301
role of capsid protease, 1301
Sendai virus
immunoglobulin A monoclonal antibodies
protection effect, 2624
mucociliary transport polymorphism
linkage to resistance/susceptibility to lethal infection, 1670
transfection of *C* gene cDNA
induction of interferon, 625
Sequence requirements
herpes simplex virus immediate-early gene
regulation by *trans*-acting factors, 190
Shope fibroma virus
core target DNA sequence
replicated poxvirus telomeres resolved, 1957
vaccinia virus symmetry, 1957
Sialylated glycoproteins
reovirus type 3 attachment protein
binding inhibition, 1407
Sigma 1 protein
reovirus serotype 3 (Dearing)
composition, 1834
multimeric form identified, 1834
Sigma 3 protein
reovirus-infected L cells
mRNA translation, 2472
Simian acquired immune deficiency syndrome
type D retrovirus clone
disease induction, 3066
DNA sequence, 3066
Simian immunodeficiency virus
major histocompatibility complex class II structures
expression in vitro, 1421
Simian virus 5
fusion and hemagglutinin-neuraminidase glycoproteins
protective immunity roles, 1972
vaccinia virus recombinants, 1972
Simian virus 40
agnoprotein production
late mRNA translation effect, 2331
agnoprotein role
replication and maturation pathway regulation, 937
A+T-rich sequence
COS cell growth, 2322
DNA replication function, 2322
core origin and transcriptional enhancer
position and orientation effects, 2973
replication role, 2973
core origin of replication
T-antigen-binding domain, 2143
cytoplasmic-localization mutant pSVCT3
nuclear large T antigen transformation, 3521
enhancer elements
revertant duplications, 3536
Ha-*ras* cotransfection
transformation cooperation, 2648
herpes simplex virus type 1 infection
DNA synthesis amplification, 1427
insoluble nuclear superstructures
association early in infection, 748
intron-containing genes
expression by baculovirus vector, 1761
large T antigen
cellular chromatin and nuclear matrix association, 3561
characterization of *trans*-dominant defective mutants, 436
origin-specific DNA-binding domain studies, 3326
subnuclear distribution analysis, 3561
synthesis and processing, 3950
large T antigen and tumor formation
relationship in transgenic mice, 2029
large T antigen dephosphorylation
ATPase and DNA-binding effect, 3373
DNA replication stimulation, 3373
large T antigen origin binding
ATP role, 3649
large T-antigen subclasses
DNA-binding activity, 2076
oligomerization, 2076
late promoter sequences
characterization, 167
monoclonal antibody probes
large T-antigen function, 411
nonkaryophilic large T antigen
trans-activation of cellular and viral promoters, 1296
small t antigen deletion mutations
tumor specificity alteration, 1282
small t-antigen complex
interactions in productively infected cells, 1240
T-antigen binding
cytosine residue methylation, 2344
interaction, 2344
T-antigen expression
analysis, 851
mouse cell nonpermissivity, 851
T-antigen mutants
DNA replication in human cells, 2864
spontaneously occurring mutants, 2864
transforming nonkaryophilic T antigen
oligomeric forms, 940
p53 complex formation, 940
VP1 missense mutations
agnogene defect suppression, 3190
effect on VP1 self-polymerization, 3190
LP1 interaction, 3190
VP2 and VP3 polypeptides
intranuclear localization, 3862
Simian virus 40 transformants
normal cell proliferation blocked
cyclic AMP effect, 1546
Simian virus 40-transformed cells
macrophage-resistant cells
gp70 expression, 928
T-antigen-positive transformation revertant cell lines
polyomavirus and adenovirus type 2 retransformation, 1821
retransformation resistance, 1821
Sinbis virus
cDNA clones
lethal mutation mapping, 3809
RNA transcript production, 3809
Single-stranded DNA
pseudorabies virus immediate-early protein
binding, 1855
Small T antigen
polyomavirus transformation
cooperation with middle T antigen, 2253
simian virus 40 cellular proteins
complex formation in productively infected cells, 1240
simian virus 40 deletion mutations
tumor specificity alteration, 1282
simian virus 40 intron-containing genes
expression by baculovirus vector, 1761
S-mRNA synthesis
La Crosse virus
translational requirement model, 3960
La Crosse virus translation requirement
in vitro studies, 87
in vivo studies, 96
S-mRNA transcripts
La Crosse virus
nucleocapsid assembly sites, 667
Spleen focus-forming virus
envelope glycoproteins with altered membrane domains
intracellular transport, 4007
leukemogenicity, 4007
Spleen focus-forming virus strain $SFFV_P$
erythropoietin response sequences
localization, 1661
Spleen lymphoid cells
woodchuck hepatitis virus-infected woodchucks
replication site, 1318
Spleen necrosis virus
mouse cell model
transcriptional replication block, 3454
src and *env* genes
Rous sarcoma virus
splicing efficiency, 177
src protein localization
detergent-insoluble cellular matrix affinities
intracellular differences, 2420
Structural protein VP1
polyomavirus
host cell influence, 509
Structural proteins
dengue virus proteins
expression by recombinant vaccinia virus, 4019
Subacute sclerosing panencephalitis
measles virus infection
interferon role, 1919
Subviral particles
poliovirus 55S particles
assembly sequence, 561
role in morphogenesis, 561
Superhelical DNAs
Campoletis sonorensis virus genome

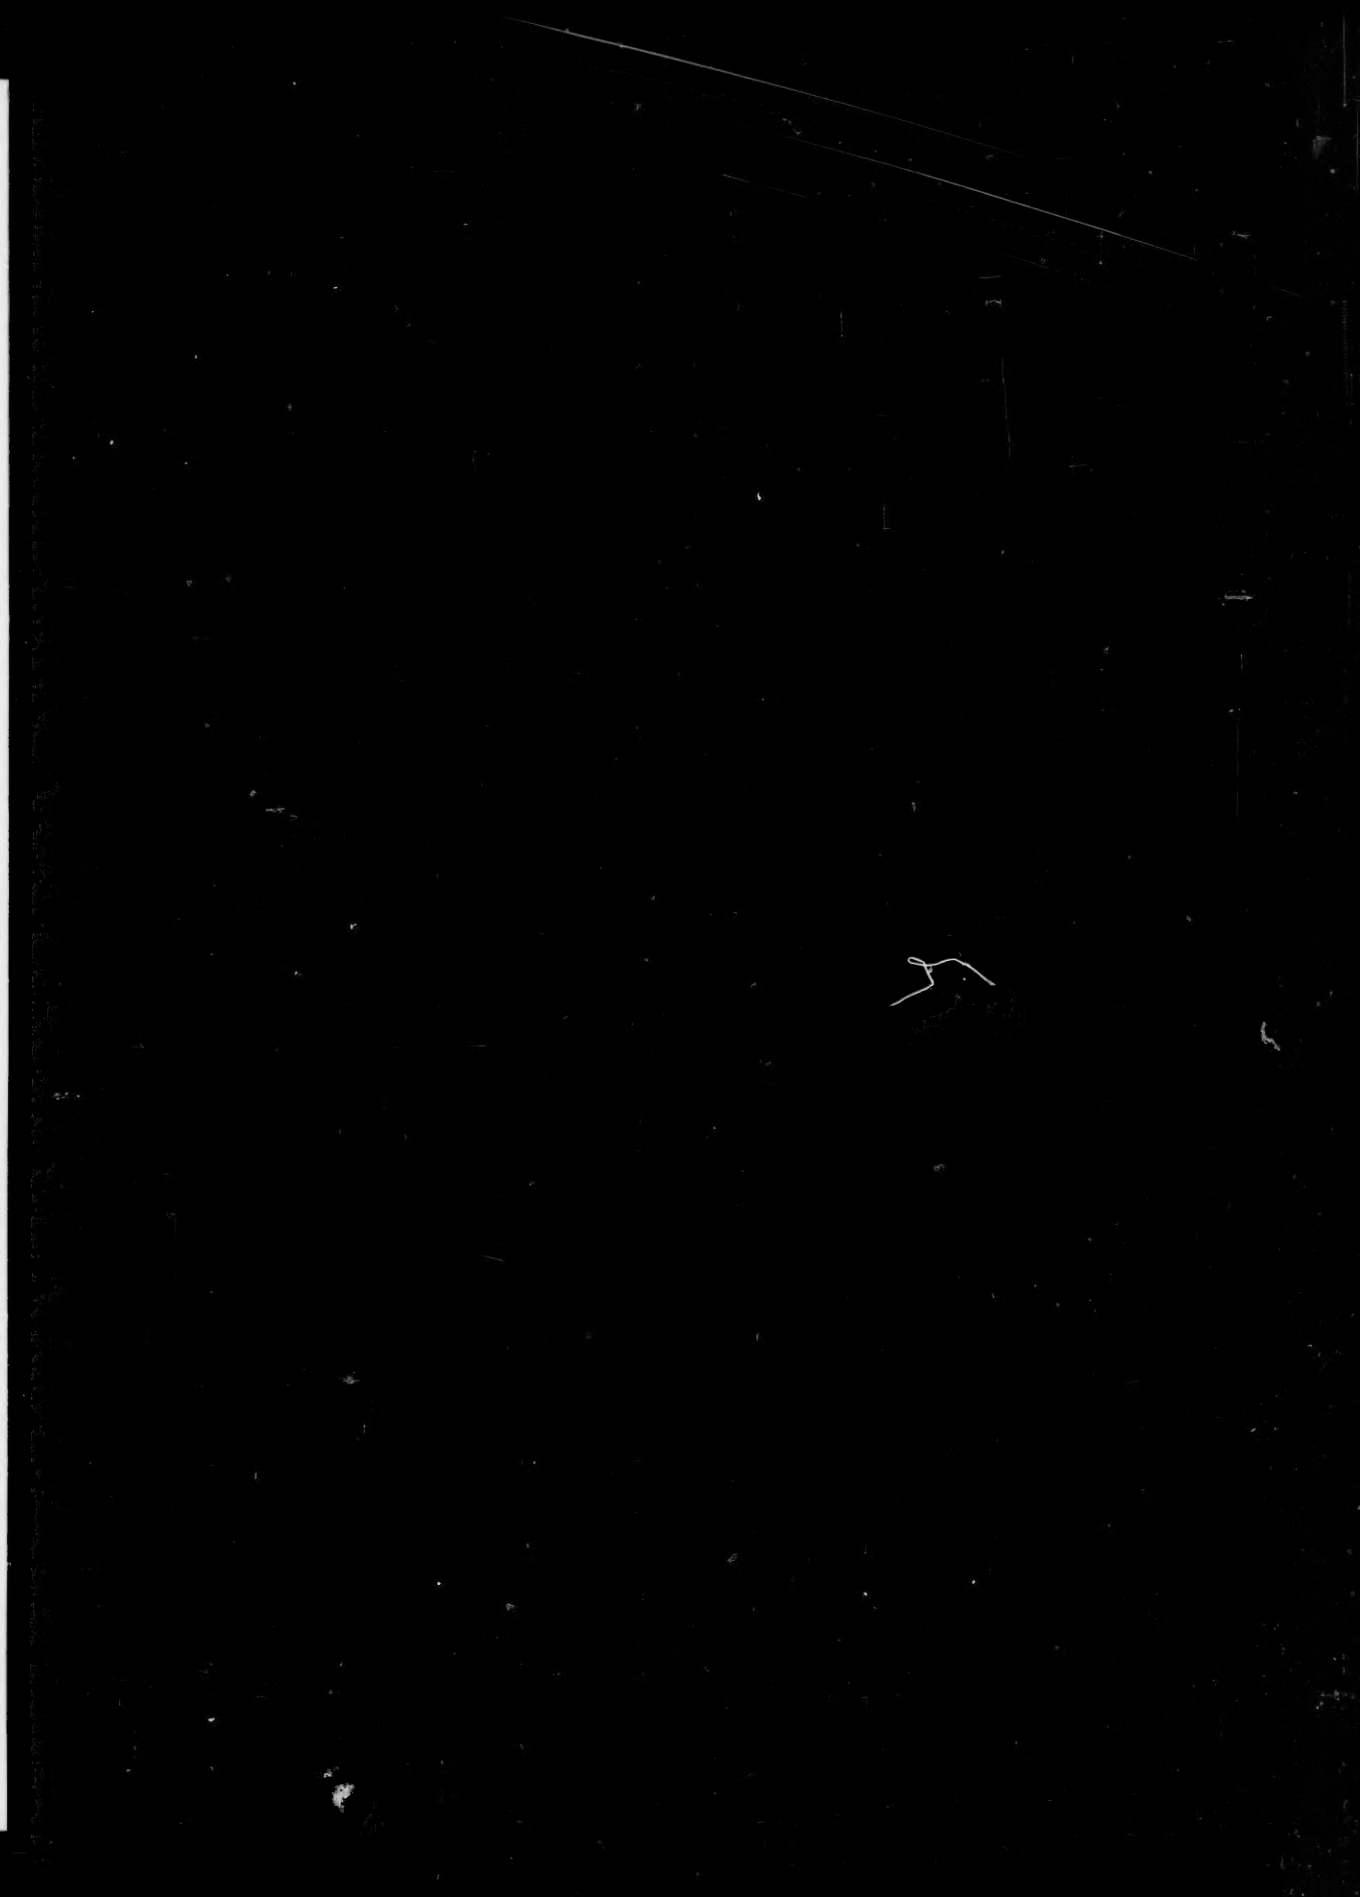
physical analysis, 2589
repeat element identification, 2589
Superinfection
human immunodeficiency viruses LAV-1 and ARV-1
induction in a chimpanzee, 4026
Surface antigen
duck hepatitis B virus pre-S polypeptide
characterization, 1384
hepatitis B virus pre-S and precore sequences
expression, 683
influences, 683
hepatitis B virus preS1 protein
regulation of secretion, 782
hepatitis B virus subtypes adr, ayr, and adyr
characterization, 3030
point mutation in *S* gene, 3030
Surface antigen genes
hepatitis B virus
expression in *Saccharomyces cerevisiae*, 3543
Surface receptors
human immunodeficiency virus T cells
downregulation, 3741
noncytopathic infection, 3741

T-antigen binding
simian virus 40 binding to origin region DNA
cytosine residue methylation, 2344
interaction, 2344
T-antigen expression
simian virus 40
mouse cell nonpermissivity, 851
T-antigen-positive cells
simian virus 40-transformed revertants
polyomavirus and adenovirus type 2 retransformation, 1821
retransformation resistance, 1821
T-cell immunity
murine cytomegalovirus
adoptive spleen cell transfer, 23
replication in adrenal gland, 23
T-cell response
human immunodeficiency virus recombinant antigens
infected chimpanzees, 3804
Temperature-sensitive mutants
adenovirus type 7
isolation and characterization, 3089
herpes simplex virus type 1
complementation by varicella-zoster virus, 225
physical mapping of host shutoff loci, 143
myeloproliferative sarcoma virus clones
activity, 889
mos oncogene point mutation, 889
poliovirus type 1 recombinants
crossing-over sites on viral genome, 1722
pseudorabies virus immediate-early gene
adenovirus type 5 E1A coinfection, 1103
transcription of class II and class III genes, 1103
pseudorabies virus immediate-early protein
role in early gene transcription, 1258
Rous sarcoma virus $p60^{v\text{-}src}$ mutants
effects, 354
vaccinia virus gene
DNA replication required region, 1398
nucleotide sequence and organization, 1398
vaccinia virus RNA polymerase subunit
characterization, 1842
vesicular stomatitis virus
phenotypic revertants, 256
sequence analysis and functional characterization, 256
vesicular stomatitis virus M protein
assembly defective, 1332
Terminal inverted repeats
bacteriophage PRD1
sequence and activity, 594
Theiler's murine encephalomyelitis virus
anti-A-I^S monoclonal antibody
timing importance of treatment, 898
treatment effect, 898
classification with cardioviruses
nucleotide sequence analysis, 1507
Thymidine kinase activity
herpes simplex virus mutants
complementation in vivo, 2171
trigeminal ganglion infection, 2171
Thymidine kinase gene
bovine herpesvirus type 1
map location, 4023
Tissue specificity
murine retroviral long terminal repeats
transcriptional activity, 1067
Tobacco etch virus
polyprotein gene
characterization and mapping, 2540
proteolytic processing, 2540
Topoisomerase inhibitors
herpes simplex virus type 1-infected mouse cells
reactivation inhibition by novobiocin and coumermycin A_1, 3288
trans-Activating function
hepatitis B virus
expression, 3448
localization in X region, 3448
trans-Activation-responsive element
parvovirus H-1 P38 promoter
characterization, 2807
Transcription termination signals
adenovirus type 2 DNA sequences
cat mRNA inhibition, 2770
localization downstream, 2770
Transcriptional control elements
Rous sarcoma virus
characterization, 1171
expression, 1171
Transcriptional control region
BK virus MM strain variants
structure and function, 1747
Transformation
adenovirus type 5 E2B mutations
DNA polymerase role, 3630
human papillomavirus type 16
human fibroblasts and keratinocytes, 1061
human papillomavirus type 18 E6 and E7 ORFs
transforming function localization, 3635
Transformation-defective mutant
polyomavirus middle T antigen
association with 73-kilodalton heat shock protein, 405
Transformed human fetal glial cells
JC virus mutants
permissivity increased, 755
trans-Inducing protein
herpes simplex virus type 1 proteins
characterization, 2428
Transmissible mink encephalopathy virus
infectious process in mink
extraneural replication, 3235
temporal distribution, 3235
$tRNA^{Pro}$ primer-binding site
retrovirus-related sequence
characterization, 2071
homologous sequences, 2071
synthetic oligonucleotide probes, 2071
Tumor formation
simian virus 40 large T antigen
relationship in transgenic mice, 2029
Tumorigenicity
bovine papillomavirus type 1-infected hamster cells
RNA levels and protein expression, 2924
Type D retrovirus clone
simian acquired immune deficiency syndrome
disease induction, 3066
DNA sequence, 3066
Type I collagen
retroviral-vector-mediated transfer of proα1(I) gene
Mov-13 mouse strain model, 2549
phenotype rescue, 2549
Tyrosine kinase activity
v-*src*, v-*fgr*, and v-*yes* gene products
monoclonal antibody inhibition, 1927
$pp60^{v\text{-}src}$ binding, 1927
Tyrosine-specific protein kinases
$pp60^{c\text{-}src}$ and $pp60^{v\text{-}src}$
affinity for detergent-insoluble cellular matrix, 2420

U_3 region sequences
Friend and Moloney murine leukemia viruses
disease specificity determinants, 693
Uracil-DNA glycosylase
herpes simplex virus cDNA
activity origin, 3040
isolation, 3040
UV irradiation
scrapie prions
resistance to inactivation, 159

v-*abl* involvement
Moloney murine leukemia virus-induced myeloid tumors
c-*myb* activation requirement, 3721
Vaccinia virus
14-kilodalton fusion protein
mapping and nucleotide sequence, 3550
39,000-M_r immunodominant protein
structure and function, 3910
attenuation and structural protein modifications
persistent infection effects, 2642
cell fusion
formation of covalently linked trimers, 395
role of 14,000-M_r envelope protein, 395
DNA-dependent RNA polymerase subunits

analysis, 1765
localization, 1765
temperature-sensitive mutant characterization, 1842
gene required for DNA replication
nucleotide sequence and organization, 1398
high-frequency homologous DNA recombination
mechanisms, 1788
late gene cluster
expression and regulation, 639
nucleoside triphosphate phosphohydrolase I gene
identification, 1738
recombinants expressing respiratory syncytial virus proteins
immune and histopathological responses, 3855
regulatory region of late promoter
DNA replication, 75
temperature-sensitive mutant
molecular genetic analysis, 3152
role in DNA replication, 3152
Vaccinia virus recombinants
carrying respiratory syncytial virus N gene
construction and characterization, 2885
transcription and translation products, 2885
vaccine efficacy, 2885
Vaccinia virus vectors
hepatitis B virus middle surface protein
expression of pre-S and S epitopes, 1286
herpes simplex virus type 1 glycoprotein D
cytotoxic T-cell response, 726
human parainfluenza virus type 3 F and HN glycoproteins
contribution to host immunity, 3416
expression, 3416
polyomavirus virion proteins
kinetics of association of VP1, VP2, and VP3, 516
subcellular distribution of proteins, 516
pseudorabies virus glycoprotein gp50
subunit vaccine evaluation, 3977
respiratory syncytial virus F protein expression
protection of vaccinated mice, 293
Varicella-zoster virus
complementation of herpes simplex virus type 1 *ts* mutants, 225
cytotoxic T-cell response
detection and frequency analysis, 3463
glycoprotein gpII(140)
assembly and processing, 2877
O-linked glycans, 2877
infection in marmosets
infectivity model, 2951
v-*erbB*/*src* fusion polypeptide
chimeric oncogene
analysis, 1938
Vesicular stomatitis virus
antibody response by ELISA
asymmetrically cross-reactive antibodies, 2509
immunodominance of serotype-specific determinants, 2509
coevolution of virus and defective interfering particles
complete resistance to DI particles, 454
cytotoxic T-lymphocyte recognition of nucleoprotein antigen
bm3 mutant effect, 1992
interferon action in RD-114 clonal derivatives
different antiviral and gene-inducing responses, 2727
interferon treatment
expression in RD-114 cells, 1524
replication inhibition, 653
interferon treatment effects
coinfection with adenovirus, 787
modulation by early region 1A, 787
leader RNA and mRNA synthesis
ATP concentration effect, 3470
leader RNA synthesis
cytopathogenicity in *Drosophila* cells, 1391
M protein mutants
assembly defective, 1332
permissive macrophages in mice
interferon, reduced levels, 812
mechanism for natural resistance, 812
recombinant polymerase protein L
homotypic and heterotypic exclusion, 3133
serotypes Indiana and New Jersey
molecular epizootiology and evolution, 1029
temperature-sensitive M protein mutants
phenotypic revertants, 256
sequence analysis and functional characterization, 256
Vesiculoviruses
genome RNA terminus conservation and diversity
sequence analysis, 200
v-*fos* oncogene
avian transforming virus NK24
characterization, 3733
*vhs*1 mutant
herpes simplex virus type 1
stability of immediate-early *alpha* mRNAs, 604
Vimentin
adenovirus infection
cleavage and processing, 2559
early occurrence, 2559
Moloney murine sarcoma virus P55 protein
biological and biochemical analysis, 3625
identification, 3625
v-*mos* expression, 3625
Visna virus
complex transcriptional pattern
significance, 1325
envelope glycoprotein gp135
topographical rearrangements during antigenic drift, 1019
lentivirus envelope proteins
hypervariable site in *env* gene, 4046
sequence homology, 4046
v-*mil* sequences
MH2 virus
propagation in vivo or in vitro, 1949
v-*mos* expression
Moloney murine sarcoma virus proteins
biological and biochemical analysis, 3625
P55 and vimentin identification, 3625
VP1 capsid protein
poliovirus type 1
neutralizing antibody induction, 1442
production in *Escherichia coli*, 1442
polyomavirus
calcium localization, 2934
VP1 missense mutations
simian virus 40
agnogene defect suppression, 3190
effect on self-polymerization, 3190
LP1 interaction, 3190
VP7 glycoprotein gene
SA11 rotavirus
expression in vaccinia virus recombinants, 1054
serotype-specific neutralizing antibodies, 1054

West Nile virus
nonstructural protein NS5
RNA synthesis role, 3641
separation from polymerase activity, 3641
Woodchuck hepatitis virus
ground squirrel hepatitis recombinants
infectivity, 3241
synthesis of novel viruses, 3241
lymphoid cells in infected woodchuck spleens
replication site, 1318


Xanthomonas campestris pv. *oryzae*
bacteriophage Xp10 genome
rifampin-resistant transcription, 1695
Xenotropic murine leukemia virus
mink cell focus-forming virus and proviral genes
env gene probes, 3082
wild mouse origins, 3082
